Rising 5th Grade Summer Math Packet

Hooray! You are officially an incoming 5th grader! This math packet has been created to ensure that you are prepared and ready to start the year off with math confidence.

This packet includes skill practice and reviews the concepts you covered in fourth grade. It also includes worksheets to practice your basic math skills.

Below you will find directions for completing the packet.

Directions:

- Please write your first and last name on the packet.
- All work is to be neat and completed in pencil without the use of a calculator.
- Keep your packet in a folder and in a safe place to help you stay organized.
- I suggest that you do one page of multiple-choice questions and one page of basic math skills each week.
- You should complete the problems on each page by showing your work in the space provided.
- Please do not skip problems. If you find a problem that you are unfamiliar with or have forgotten, look for resources online: IXL or Khan Academy.
- Once you have solved a problem, ask yourself, "Does my answer make sense?"
- IXL will be available as a resource throughout the summer. You will continue to use your current IXL username and password.
- This math packet is to be turned in the first week of school to your math teacher. This will count as your first math grade as a 5th grader!

That "sums" it up! Have a great summer! See you in August!
